www.linkedin.com/in/coachiko

Date of birth: 01/12/2001 • Address: Alf-Maskan, Cairo

A mobile app developer specializing in Flutter, with a strong passion for software development. This enthusiasm has led to exploring areas like backend development. Actively seeking an environment that encourages growth and provides opportunities to enhance and develop skills.

Education

Bachelor Degree, 2024, A+ Graduation Project.

Computers and Information, Zagazig University.

Languages

- Arabic (mother tongue).
- English fluency (written and spoken).

Conceptual Skills

- **Problem Solving:** Proficient in troubleshooting and optimizing efficiency.
- **Programming Languages:** Proficient in Dart, Python, C++ and other.
- **OOP Concepts.**
- **SOLID principles.**
- **Data structure and Algorithms.**
- **Design Patterns.**
- **Agile Methodology.**

Technical Skills:

- | | | | |
|------------|----------------|---------------|----------------|
| • FLUTTER | • Firebase | • RESTful API | • Localization |
| • RETROFIT | • CUBIT | • GetX | • MVVM |
| • MVC | • JSON | • Google MAPS | • CLEAN ARCHs |
| • CI-CD | • FLAVORS | • Testing | • VOIP |
| • PAINTER | • OPTIMIZATION | • CACHING | • WEBRTC |
| • Payment | • MODULAR CODE | • SECURITY | • WEB SOCETS |

Soft Skills:

- | | | | |
|-------------------|----------------|--------------|-----------------|
| • Communication | • Adaptability | • Teamwork | • Collaboration |
| • Problem-solving | • Attention | • Leadership | • Resilience |
| • Time-management | • Empathy | • Integrity | • Creativity |

Experience :

EGYTEL (Full Time Flutter Developer)

(DEC 2024 - AUG 2026)

HATIF APP (Flutter)

JAN 2026

- Developed a VoIP mobile application enabling secure SIP calls with native WebSocket call, smart wake locks, and optimized battery usage for stable communication.
- Integrated CRM features to manage leads, contacts, and support tickets, including detailed call histories, recordings, and callback functions.
- Delivered a multi-language interface with dark mode and robust state management to help businesses track performance and improve customer service. ([Demo](#))

HATIF Desktop (Flutter)

MAY 2026

- Developed a desktop application with system tray integration, minimize-to-tray behavior, single-instance lock, and incoming call popup with always-on-top alerting for uninterrupted communication.
- Engineered a desktop-optimized dial panel with full keyboard number input, resizable split layouts, and compact phone-only view alongside master-detail CRM screens for efficient multitasking.
- Implemented a Windows-native audio service and MCI fallback for reliable ringtone playback, plus resizable desktop shells and platform-aware crash management for a polished desktop experience.

INMAA TECH (Full Time Flutter Developer)

(OCT 2024 - DEC 2024)

ARAB CARE

NOV 2024

- Arab Care is a healthcare mobile app that connects patients with doctors, hospitals, and clinics across the Arab world. It helps users easily search by specialty or location, view detailed doctor profiles, and contact them directly. The app also allows saving favorites, customizing profiles, and receiving notifications for a smoother healthcare experience. ([GOOGLE PLAY - APPSTORE](#))

E7KKY

NOV 2024

- E7kky is a Flutter-based women's app that combines articles, magazines, events, and live sessions in one engaging platform. It offers a mental health chatbot, a smart period tracker, and an interactive community space to support women's wellbeing and daily needs. With a clean design and personalized notifications, E7kky empowers women to stay informed, connected, and inspired. ([Demo](#))

AQAR APP

SEP 2024

- A comprehensive application that allows travelers to rent apartments, hotels, cars, or wedding halls. It also enables agents and property owners to list their properties, such as apartments, villas, land, and commercial spaces, for sale or rent. The app provides dynamic contracts that ensure the rights of all parties involved, along with property management services like maintenance and repairs, making it a complete and reliable solution. ([Demo](#))

CHMD

OCT 2024

- The app helps protect against inflation by allowing users to save their money in any currency of their choice, with the ability to exchange it at any time based on real-time market prices. It features an elegant user interface, ensuring a seamless and efficient experience ([Demo](#))

EDUCATION APP

OCT 2024

- The app helps protect against inflation by allowing users to save their money in any currency of their choice, with the ability to exchange it at any time based on real-time market prices. It features an elegant user interface, ensuring a seamless and efficient experience. ([Demo](#))

Independent Projects:

COACHIKO FOLLOW UP (Flutter – Back End (PHP) – Analysis – UI-UX)**FEB 2024**

- An application designed to assist both fitness clients and their coaches. Coaches can track and manage their trainees, while clients can monitor their progress and record their data with reminders. (**Demo**)

ALZAWARE (Graduation Project) (Flutter – Deep Learning)**Jan 2024**

- An application designed to assist Alzheimer's sufferers using deep learning to predict the disease. (**Demo**)
